

Achievements in the DJ Basin

We have benefitted from and proven integral to growth and improvement with each and every client we work with, finding further ways to improve current operators' processes and performance. We take and impose the utmost care, attention, flexibility and proactive approaches to all facets of optimizing the services we provide all our customers.

Our DJ Basin teams' performance over the past 2 years is proving that drilling the vertical, setback, curve and lateral to TD (~5,000' TVD / ~12,700' MD) is achievable in less than 4 days.

|  Total Directional Services LLC DJ Basin Mono-Bore Well Performance Tracker | | | | |
|---|---------------|----------------|--------------------|-------------|
| Well Interval (Days) | Target (Days) | Average (Days) | Latest Well (Days) | Best (Days) |
| Drill SFC | 0.5 | 0.3 | 0.3 | 0.2 |
| D/O & Drill Vertical | N/A | N/A | N/A | N/A |
